## EDUCATION

**BS Software Engineering**  
City University of Science and  
Information Technology  
2022 - 2026

**FSc (HSSC) in Pre -  
Medical**  
Imperial College  
2018 - 2020

**SSC (Secondary School  
Certificate) in Science**  
City Grammar School  
2007 - 2018

## SKILLS

- Python
- React
- SQL
- C++
- MySQL NoSQL
- WEB Development
- Mobile Application
- Communication Skills
- Digital Marketing
- Ms Office

## LANGUAGE

- English
- Urdu
- Pashto

## PROFILE

Dedicated and motivated Software Engineering student with a strong passion for software development, web technologies, and problem-solving. Skilled in developing responsive web and mobile applications through academic and freelance projects. Possess a solid foundation in programming languages including Python, C++, SQL, React, and modern web development technologies.

Experienced in working on team-based projects, improving application performance, and creating user-friendly systems. Proficient in Microsoft Office tools (Word, Excel, and PowerPoint) for professional documentation, presentations, and data management. Strong communication, teamwork, and analytical skills with a willingness to learn new technologies and contribute effectively in a professional environment.

## WORK EXPERIENCE

### Internship: Junior Software Developer

**TechSolutions Inc. – June 2023 to August 2023**

Developed and tested web applications using React.js and Node.js, enhancing user functionality. Collaborated with a team to improve application performance by 25% through code optimization. Conducted software debugging, reducing errors and improving system reliability.

## Projects

### University Project – Tourism Agency Platform

Designed and developed a responsive tourism agency platform as a university project, connecting clients with multiple travel agencies through a single online system. Implemented features for agencies to advertise and manage travel packages, improving customer communication and online visibility. Enhanced website performance, user experience, and mobile accessibility using modern web development technologies.

### Academic Project: Library Management System

**University Project – September 2022 to December 2022**

Led a team of 4 to create a library management system using Java and MySQL. Integrated a search functionality, allowing users to locate books efficiently. Presented the project, receiving recognition for its robust design and usability.
